INDEX TO VOLUME 82 (JANUARY–JUNE 1956)

(Note: In all divisions of this index, the letter (L) following a title indicates a letter to the editors.)

Title Index of Articles and Letters

AAAS affairs: AAAS constitution and bylaws, D. Wolfle, 146; AAAS council meeting, 1955, D. Wolfle, 151; AAAS headquarters, 265; AAAS membership, 158; AAAS officers, committees, and representatives for 1956, 155; AAAS sections call for papers for the New York meeting, 266; AAAS socio-psychological prize, 266; Report of the Atlanta meeting, R. L. Taylor, 159; Traveling high-school science libraries, H. J. Deason, 51

Acid-base terminology, T. P. Nash, Jr., 255

Atmospheric pollution and zoning in an urban area, F. N. Frenkiel, 194

Betwixt and between dates (L), R. N. Mayall, 210

Biologist looks at human nature, a, L. von Bertalanffy, 33

Challenge of arid lands, B. T. Dickson, 67

Colorado Dam controversy, A. M. Woodbury, 304

Comments on crop yield data (L), L. Wickenden; R. W. Simonson, 212

Crisis in science education, the, (symposium), 277

Current problem [science education] in perspective, C. Dollard, 277

Early history of radio astronomy, G. C. Southworth, 55

Form and symmetry in organisms (L), J. S. Miller, 211

Future of atomic energy, J. Cockcroft, 136

History of science and the sociology of science, H. Dingle, 107

Human resources and national security, E. Ginzberg, E. A. Fitzpatrick, H. A. Meyerhoff, E. M. Kulischer, 121

Mapping the land, A. H. Robinson, 294

Mathematicians at Ticonderoga, D. J. Struik, 236

Mathematics and natural philosophy, N. Bohr, 85

Meaninglessness of the word *protoplasm*, G. Hardin, 112

Nation's interest in scientists and engineers, A. S. Flemming, 282

New attempt to cross antarctic, D. G. Stratton, 42

Physics and metaphysics, M. Born, 229

Population movements in the southern United States, H. L. Hitt, 241

Principles of mathematical physics, H. Poincaré, 165

Problems in zoological polymorphism, J. M. Burns, 75

Radar echoes from birds and insects, L. L. Bonham and L. V. Blake, 204

Radioactive methods for geologic and biologic age determinations, O. Hahn, 258

Recent developments in the detection and measurement of infrared radiation, R. A. Smith, 3

Role of the federal government in science education, A. T. Waterman, 286

Role of science in marine fisheries: limitations and potentialities, R. E. Coker, 176

Solar eclipse activities in Ceylon, 1955, T. D. Nicholson, 221

Some merits and misinterpretations of scientific method, P. F. Schmidt, 20

Sun's energy, the, F. Daniels, 247

Survey of the Gothic Natural Area, H. A. McCullough, 25

Techniques used in studies with high-intensity gamma radiation, L. E. Brownell and J. V. Nehemias, 89

Author Index

Adams, M. H., Book review, 215, 315

Berdan, J. M., Book review, 143

Bertalanffy, L. von, A biologist looks at human nature, 33

Blake, L. V. *See* Bonham, L. L., 204

Bliss, A. D., Book review, 213

Boehm, W. W., Book review, 216

Bohr, N., Mathematics and natural philosophy, 85

Bonham, L. L., Radar echoes from birds and insects, 204

Born, M., Physics and metaphysics, 229

Bowman, K. M., Book review, 46

Brodbeck, M., Book review, 96

Brownell, L. E., and J. V. Nehemias, Techniques used in studies with high-intensity gamma radiation, 89

Burns, J. M., Problems in zoological polymorphism, 75

Child, I. L., Book review, 267

Cockcroft, J., Future of atomic energy, 136

Coker, R. E., Role of science in marine fisheries: limitations and potentialities, 176

Constance, L., Book review, 213

Daniels, F. The sun's energy, 247

Deason, H. J., Traveling high-school science libraries, 51

Dickson, B. T., Challenge of arid lands, 67

Dingle, H., History of science and the sociology of science, 107

Dollard, C., Current problem [science education] in perspective, 277

Dyke, H. G., Book review, 48

Estermann, I., Book review, 315

Ewan, J., Book review, 218

Eynon, A. E., Book review, 319

Fehr, H. F., Book review, 270

Feld, B. T., Book review, 314

Fitzpatrick, E. A. *See* Ginzberg, E., 121

Flemming, A. S., Nation's interest in scientists and engineers, 282

Fogg, Jr., J. M., Book review, 214

Frenkiel, F. N., Atmospheric pollution and zoning in an urban area, 194

Galdston, I., Book review, 103

Gamble, E. L., Book review, 142

Gardner, T. S., Book review, 143

Gerard, R. W., Book review, 98

Ginzberg, E., Human resources and national security, 121

Glass, B., Book review, 99

Hahn, O., Radioactive methods for geologic and biologic age determinations, 258

Hardin, G., Book review, 217; Meaninglessness of the word *protoplasm*, 112

Hasler, A. D., Book review, 214

Hedgpeth, J. W., Book review, 49, 104, 143

Henshaw, P. S., Book review, 271

Hitt, H. L., Population movements in the southern United States, 241
Hobbs, A. W., Book review, 217
Holt, R. R., Book review, 270

Imbrie, J., Book review, 269

Korzenovsky, M., Book review, 315
Kulischer, E. M. *See* Ginzberg, E., 121

LeCorbeiller, P., Book review, 97
Loeb, M. B., Book review, 268

Mayall, R. N., Betwixt and between dates (L), 210
McCullough, H. A., Survey of the Gothic Natural Area, 25
McFarland, A. C., Book review, 314
Meyerhoff, H. A., Book review, 100. *See* Ginzberg, E., 121
Miller, J. S., Form and symmetry in organisms (L), 211
Milne, L. J. and M., Book review, 268

Nash, Jr., T. P., Acid-base terminology, 255
Nehemias, J. V. *See* Brownell, L. E., 89
Nicholson, T. D., Solar eclipse activities in Ceylon, 1955, 221

Oppenheimer, J., Book review, 97
Osserman, E. F., Book review, 272

Pepper, S. C., Book review, 97
Philpott, J., Book review, 216
Poincaré, H., Principles of mathematical physics, 165
Pratt, J. G., Book review, 100
Price, D. K., Book review, 99

Rainey, F., Book review, 103
Rashevsky, M., Book review, 316
Raynor, G. V. S., Book review, 47
Rehder, H. A., Book review, 272
Reissner, A., Book review, 318
Robinson, A. H., Mapping the land, 294

Schmidt, P. F., Some merits and misinterpretations of scientific method, 20
Sears, P. B., Book review, 317
Sears, P. S., Book review, 101
Seeger, R. J., Book review, 43, 215
Selye, H., Book review, 144
Shapiro, H. L., Book review, 268
Simonson, R. W., Comments on crop yield data (L), 212
Smith, R. A., Recent developments in the detection and measurement of infrared radiation, 3
Southworth, G. C., Early history of radio astronomy, 55
Stewart, J. Q., Book review, 318
Stratton, D. G., New attempt to cross antarctic, 42
Straw, H. T., Book review, 104
Struik, D. J., Mathematicians at Ticonderoga, 236

Taeuber, I. B., Book review, 102
Taylor, R. L., Report of the Atlanta meeting, 159
Taylor, W. R., Book review, 99
ter Haar, D., Book review, 271

Van Beek, G. W., Book review, 316
Velardo, J. T., Book review, 142

Walker, E. H., Book review, 48, 317
Walling, C., Book review, 101
Waterman, A. T., Role of the federal government in science education, 286
Weiss, F. J., Book review, 49
Wickenden, L., Comments on crop yield data (L), 212
Wolfle, D., AAAS constitution and bylaws, 146; AAAS council meeting, 1955, 151
Woodbury, A. M., Colorado Dam controversy, 304

Yagoda, H., Book review, 267

ZoBell, C. E., Book review, 218
Zwemer, R. L., Book review, 269

Books Reviewed

Abbott, R. T., *Introducing Sea Shells*, 49
Adaptive Human Fertility, P. S. Henshaw, 142
Advanced Calculus, A. E. Taylor, 217
Africa Today, C. G. Haines, 104
Allendoerfer, C. B., *Principles of Mathematics*, 270
Antimetabolites and Cancer, C. P. Rhoads, Ed., 272
Anxiety and Stress, H. Basowitz, H. Persky, S. J. Korchin, R. R. Grinker, 144
Augustine to Galileo, A. C. Crombie, 96

Bailey, I. W., *Contributions to Plant Anatomy*, vol. 13, 216
Sir Joseph Banks, the Autocrat of the Philosophers, 1744–1820, H. C. Cameron, 218
Basowitz, H., *Anxiety and Stress*, 144
Bell, W. J., Jr., *Early American Science*, 97
Berrill, N. J., *Man's Emerging Mind*, 268
Die Binnengewasser in Natur und Kultur, A. Thienemann, 214
Biochemistry: an Introductory Textbook, F. Haurowitz, 315
Bird Navigation, G. V. T. Matthews, 100
Niels Bohr and the Development of Physics, W. Pauli, Ed., 314
Boner, H., *Hungry Generations*, 49
Bornemisza, S. T., *The Unified System Concept of Nature*, 217
The Botany of Cook's Voyages and Its Unexpected Significance in Relation to Anthropology, Biogeography and History, vol. 14, E. D. Merrill, 214
Brucker, R. W. *See* Lawrence, J., Jr., 314
Burmester, M. A. *See* Lawson, C., 49

Calder, R., *Science in Our Lives*, 97
Cameron, H. C., *Sir Joseph Banks, the Autocrat of the Philosophers, 1744–1820*, 218
Campbell, J. A. *See* Steiner, L. E., 142
Careers and Opportunities in Science, P. Pollack, 100
The Caves Beyond, J. Lawrence, Jr., and R. W. Brucker, 314
Ceram, C. W., *The Secret of the Hittites*, 316
Charles Darwin: a Great Life in Brief, R. Moore, 99
Congress for Cultural Freedom, *Science and Freedom, a Symposium*, 316
Contributions to Plant Anatomy, vol. 15, I. W. Bailey, 216
Core, E. L., *Plant Taxonomy*, 213
The Crime of Galileo, G. de Santillana, 43
Crombie, A. C., *Augustine to Galileo*, 96
Culture and Experience, A. I. Hallowell, 267
Culture and Human Fertility, F. Lorimer, 102
Culture and Mental Disorders, J. W. Eaton and R. J. Weil, 268
Current Trends in Psychology and the Behavioral Sciences, J. T. Wilson, C. S. Ford, B. F. Skinner, G. Bergmann, F. A. Beach, K. Pribram, 98

Daggett, A. F., *Quantitative Analysis*, 213
Darwin, C., *The Expression of the Emotions in Man and Animals*, 318

Early American Science, W. J. Bell, Jr., 97
Eaton, J. W., *Culture and Mental Disorders*, 268
Edel, A., *Ethical Judgment*, 97
Ellison, M. A., *The Sun and Its Influence*, 271
Emberger, M. R., *Scientific Writing*, 269
Esslinger, W., *Politics and Science*, 99
Ethical Judgment, A. Edel, 97
The Expression of the Emotions in Man and Animals, C. Darwin, 318

Fact, Fiction, and Forecast, N. Goodman, 215
Fauna and Flora of Nepal Himalaya, vol. I, H. Kibara, Ed., 317
Fisher, J. *See* Peterson, R. T., 319
Fosberg, F. R. *See* Sachet, M.-H., 48
Fraser, R., *Molecular Beams*, 315
Friedlander, W. A., *Introduction to Social Welfare*, 216
Fulton, J. S., *Science and Man's Hope*, 268

General Chemistry, L. E. Steiner and J. A. Campbell, 142
Goodman, N., *Fact, Fiction, and Forecast*, 215
Grinker, R. R. *See* Basowitz, H., 144

Haines, C. G., *Africa Today*, 104
Hall, M. R. *See* Emberger, M. R., 269
Hallowell, A. I., *Culture and Experience*, 267
Hardin, G. *See* Lawson, C., 49
Haurowitz, F., *Biochemistry: an Introductory Textbook*, 315
Henshaw, P. S., *Adoptive Human Fertility*, 142
Hermans, P. H., *Introduction to Theoretical Chemistry*, 101
Highway to the North, F. Illingworth, 103
How to Know the Fresh-Water Algae, G. W. Prescott, 99
Hungry Generations, H. Boner, 49

Illingworth, F., *Highway to the North*, 103
Institut Royal des Sciences Naturelles de Belgique, *Volume jubilaire, Victor Van Straelen, directeur de l'institut royal des sciences naturelle de Belgique, 1925–1954*, 143
Introducing Sea Shells, R. T. Abbott, 49
Introduction to Social Welfare, W. A. Friedlander, 216
Introduction to Theoretical Organic Chemistry, P. H. Hermans, 101
Island Bibliographies, M.-H. Sachet and F. R. Fosberg, 48

Johnson, F. H., Ed., *The Luminescence of Biological Systems*, 218
Jones, E., *The Life and Work of Sigmund Freud*, vol. 2, 270

Kibara, H., Ed., *Fauna and Flora of Nepal Himalaya*, vol. I, 317
Kluyver, A. J., *The Microbes' Contribution to Biology*, 315
Korchin, S. J. *See* Basowitz, H., 144

Laboratory Studies in Biology: Observations and Their Implications, C. Lawson, R. Lewis, M. A. Burmester, G. Hardin, 49
Latil, P. de, *The Underwater Naturalist*, 143
Lawrence, J., Jr., *The Caves Beyond*, 314
Lawson, C., R. Lewis, M. A. Burmester, G. Hardin, *Laboratory Studies in Biology: Observations and Their Implications*, 49
Lewis, R. *See* Lawson, C., 49
Ley, W., *Salamanders and Other Wonders*, 143
The Life and Work of Sigmund Freud, vol. 2, E. Jones, 270
Lorimer, F., *Culture and Human Fertility*, 102
The Luminescence of Biological Systems, F. H. Johnson, Ed., 218

Management of Addictions, E. Podolsky, Ed., 46
Man's Emerging Mind, N. J. Berrill, 268
Marine Shells of the Western Coast of Florida, L. M. Perry and J. S. Schwengel, 272
Matthews, G. V. T., *Bird Navigation*, 100
Meldrum, W. B. *See* Daggett, A. F., 213
Merrill, E. D., *The Botany of Cook's Voyages and Its Unexpected Significance in Relation to Anthropology, Biogeography and History*, vol. 14, 214
The Microbes' Contribution to Biology, A. J. Kluyver and C. B. Van Niel, 315
Molecular Beams, R. Fraser, 315
Moore, R., *Charles Darwin: a Great Life in Brief*, 99
Moore, R. C., Ed., *Treatise on Invertebrate Paleontology*, pt. E, 269

Oakley, C. O. *See* Allendoerfer, C. B., 270
Observational Astronomy for Amateurs, J. B. Sidgwick, 318

Patent Law in the Research Laboratory, J. K. Wise, 48
Pauli, W., Ed., *Niels Bohr and the Development of Physics*, 314
Pearson, G. H. J., *Psychoanalysis and the Education of the Child*, 101
Perry, L. M., *Marine Shells of the Western Coast of Florida*, 272
Persky, R. *See* Basowitz, H., 144
Peterson, R. T., *Wild America*, 319
Plant Taxonomy, E. L. Core, 213
Podolsky, E., Ed., *Management of Addictions*, 46
Poissons, IV, Téléostéens Acanthoptérygiens, pt. 1, M. Poll, 104
Politics and Science, W. Esslinger, 99
Poll, M., *Poissons, IV, Téléostéens Acanthoptérygiens*, pt. 1, 104
Pollack, P., *Careers and Opportunities in Science*, 100
Practical Horticulture, J. S. Shoemaker and B. J. E. Teskey, 47
Prescott, G. W., *How to Know the Fresh-Water Algae*, 99
Principles of Mathematics, C. B. Allendoerfer and C. O. Oakley, 270
Psychoanalysis and the Education of the Child, G. H. J. Pearson, 101

Quantitative Analysis, A. F. Daggett and W. B. Meldrum, 213

Rhoads, C. P., Ed., *Antimetabolites and Cancer*, 272
Riddle, O., *The Unleashing of Evolutionary Thought*, 317
Rome beyond the Imperial Frontiers, M. Wheeler, 215
Rosen, M. W., *The Viking Rocket Story*, 267

Sachet, M.-H., and F. R. Fosberg, *Island Bibliographies*, 48
Salamanders and Other Wonders, W. Ley, 143
Santillana, G. de, *The Crime of Galileo*, 43
Sax, K., *Standing Room Only*, 271

Schwengel, J. S. *See* Perry, L. M., 272
Science and Freedom, a Symposium, Congress for Cultural Freedom, 316
Science and Man's Hope, J. S. Fulton, 268
Science in Our Lives, R. Calder, 97
Scientific Writing, M. R. Emberger and M. R. Hall, 269
The Secret of the Hittites, C. W. Ceram, 316
Shoemaker, J. S., and B. J. E. Teskey, *Practical Horticulture,* 47
Sidgwick, J. B., *Observational Astronomy for Amateurs,* 318
Standing Room Only, K. Sax, 271
Steiner, L. E., *General Chemistry,* 142
The Story of Medicine, K. Walker, 103
The Sun and Its Influence, M. A. Ellison, 271

Taylor, A. E., *Advanced Calculus,* 217
Teskey, B. J. E. *See* Shoemaker, J. S., 47
Thienemann, A., *Die Binnengewasser in Natur und Kultur,* 214
Treatise on Invertebrate Paleontology, pt. E, R. C. Moore, Ed., 269
The Underwater Naturalist, P. de Latil, 143
The Unified System Concept of Nature, S. T. Bornemisza, 217
The Unleashing of Evolutionary Thought, O. Riddle, 317

Van Niel, C. B. *See* Kluyver, A. J., 315
The Viking Rocket Story, M. W. Rosen, 267
Volume jubilaire, Victor Van Strachlen, directeur de l'institut royal des sciences naturelles de belgique, 1925–1954, Institut Royal des Sciences Naturelles de Belgique, 143

Walker, K., *The Story of Medicine,* 103
Weil, R. J. *See* Eaton, J. W., 268
Wheeler, M., *Rome beyond the Imperial Frontiers,* 215
Wild America, R. T. Peterson and J. Fisher, 319
Wilson, J. T., C. S. Ford, B. F. Skinner, G. Bergmann, F. A. Beach, K. Pribram, *Current Trends in Psychology and the Behavioral Sciences,* 98
Wise, J. K., *Patent Law in the Research Laboratory,* 48

Analytic Subject Index

AAAS, Atlanta meeting of, 159–164; call for papers for New York meeting of, 266; constitution and bylaws of, 146–151; council meeting of, 151–155; international arid lands meeting of, 304; new headquarters building of, 265; officers, committees, and representatives of, 155–158; science teaching improvement program of, 279; socio-psychological prize of, 266; traveling high-school science libraries of, 51–54
Acid-base balance, as distinguished from alkaline reserve, 256
Acidemia, as distinguished from acidosis, 255
Agriculture, production in, 212; in U.S.S.R., 132–133
Alkalemia, as distinguished from alkalosis, 255
Allele, 78–84
American Association of Physics Teachers and study of curriculum, 291
American Museum-Hayden Planetarium, and observation of 1955 solar eclipse, 222
Amplifiers, use of, in infrared radiation measurement, 4–7
Antarctic, exploration of, 42–43
Arid lands, development of, 67–74; irrigation of, 304; use of atomic power in, 138
Association affairs. *See* AAAS
Astronomy, and 1955 solar eclipse, 221; radio, 55–66
Atmosphere, pollution of, 194–203
Atomic energy, peaceful uses of, 136–141
Atomic theory, development of 168, 172, 174

Band structure, of lead sulfide, 17
Behavior, human, biological roots of, 33–41; symbols as determinants of, 37–41
Bell Telephone Laboratories, discovery of extraterrestrial radio waves at, 55–66
Biology, as an explanation for human behavior, 33–41; radioactive methods for determining ages in, 258; and symmetry in organisms, 211; use of the term *protoplasm* in, 112–120
Botany, of Gothic Natural Area in Colorado, 27–31
Bougainville, L. A. de, 237
Brownian movement, history of theory of, 168
Butterfly, polymorphism in, 77–83

Calendar, Julian Day, uses of, 210–211
California, southern, and opposition to Colorado Dam, 311
Career, scientific, developing interest in, 131
Cartography, during French and Indian Wars, 237; methods in, 294
Causality, examples of, 230; in history, 107–109; in modern physics, 86–87
Ceylon, and 1955 solar eclipse activities, 221
Chemical reactions, as affected by gamma irradiation, 93; as affected by radiation, 140
Climate, of arid lands, 67–74; of Gothic Natural Area in Colorado, 25–26
Colorado River, controversy concerning dam in, 304
Conservation, in Colorado River Basin, 304; and development of arid lands, 67–74; of fish supply, 183–186; in the Gothic Natural Area, 25
Crater Lake, 293
Curriculum, improvements needed in secondary-school, and college, 278, 284, 291

Demography, of U.S.S.R., 133–134
Des Barres, J. F. V., 236
Determinism, in modern physics, 86–87, 230
Dinosaur National Monument, 308

Echo Park, 309
Echo sounder, use in fishing, 190–191
Ecology, and factors in polymorphism, 76–84; of Gothic Natural Area in Colorado, 27–31; marine, 186–187
Economics, of fishing, 186–187, 192
Economy, of U.S., 129–132; of U.S.S.R., 132–135
Education, and biology teaching, 119; the crisis in science, 277, 282, 286; and shortage of scientific manpower, 122–125, 131; and the teaching of the history of science, 107–111; and traveling high-school science libraries, 51–54
Electrodynamics, and early development of relativity, 169–175
Electron mobility, in semiconductors, 16
Energy, use of solar, 247
Energy gap, determination of, in semiconductors, 13–15
Engineers, shortage in supply of, 277, 282, 286
Entomology, radar echoes from insects, 208–209; use of radiation in insect control, 140
Estuaries, fishing in, 178–182
Ether, theory of, 167, 169
Evolution, and factors in polymorphism, 78–84; and human behavior, 34–37

Farms, population movement away from southern, 241
Federal aid, for science education, 286

Fisheries, cultivation of, 176–193
Foods, radiation of, 89–95, 140
Ford, E. B., on polymorphism, 76–80
Forests, conservation of, 307
Franklin, Benjamin, 250th anniversary honored, 19, 24, 32, 41
French and Indian Wars, participation of mathematicians in, 236

Gamma radiation, of food and other materials, 89–95, 140
Genetics, effects of radiation on, 140–141; and factors in polymorphism, 77–84
Geology, of antarctic, 42–43; of arid lands, 70–71; of Gothic Natural Area in Colorado, 26–27; radioactive methods for determining ages in, 258
Gothic Natural Area of Colorado, geography of, 25–32
Gravity, and map making, 296
Growth and development, biology of, and human behavior, 35–36

Hall constant, in determining properties of semiconductors, 13–16
Health factors, in atmospheric pollution, 194–196, 200, 203
Hill Family Foundation, and training of science teachers, 292
History, the logic of, 107–111
History of mathematics, 236
History of science, 229; and developments in the measurement of infrared radiation, 3–7; and early development of radio astronomy, 55–66; and state of physics in early 20th century, 165–175; the teaching of, 107–111
Holland, S., 236
Hoover Commission, and scientific manpower, 125–127
Hopkins, F. G., and contribution to biology, 113–114
House-heating and cooling, with solar energy, 252
Human behavior, biological roots of, 33–41; symbols as determinants of, 37–41
Hydrography, factors in cultivation of fisheries, 182, 188

India, use of solar energy in, 248
Indian languages, structure of, 116
Industry, changing demands upon, 129–132; pollution of atmosphere by, 194–195, 200; and radiation of foods, 93–95; role in war of, 126–127; Soviet, 132–135
Infrared radiation, measurement of, 3–19
Instinct, and human behavior, 37–41
International Map of the World, 296
Irradiation. *See* radiation

Jansky, Karl, and discovery of extraterrestrial radio waves, 55–56
Julian Day calendar, 210–211

Labor, in American industry, 129–132
Land measurement, mapping of, 294
Language, structure of, in relation to reality, 114–115
Leadership, need in business, government, and education for competent, 282
Lead salts, properties and use of, in photoconductive cells, 11–18
Learning, and human behavior, 37–41
Linguistics, implications of, for study of scientific language, 115–118
Lorentz, H. A., contribution to physics of, 171, 173
Los Angeles, atmospheric study of, 197–200, 203
Logic, of explanation in science, 21–22
Lovbinière, M. C. de, 236

Mailvaganam, A. W., and preparations for 1955 solar eclipse, 221
Man, in arid lands, 73; polymorphism in, 83–84
Management, need in business, government, and education for competent, 282
Manpower, scientific, potential in U.S. of, 121–125, 131–132; use of, in U.S. by the military, 123, 125–129; in U.S.S.R., 122, 132–135
Maps, making of, 294
Marine fisheries, cultivation of, 176–193
Mathematical Association of America, visiting lecturer program of, 291
Mathematicians, at Ticonderoga, 236
Mathematics, history of, 236; role of, in physics, 85–88
Maxwell, J. C., contribution to physics of, 166–168
Measurement, of arid land water needs, 69; of extraterrestrial radio waves, 55–56; of infrared radiation, 3–19; mapping of land, 294–303
Mechanics, development and foundations of, 165–169; and metaphysics, 230
Mechanization, in American industry, 130; in Soviet industry, 134–135
Melanism, and problems in polymorphism, 78–80
Metaphysics, and physics, 229
Meteorology, as an aid to fishing, 188, 190; factors in atmospheric pollution, 196, 200–202; factors in radar echoes, 206; and 1955 solar eclipse activities, 221
Mimicry, animal, and factors in polymorphism, 77–84
Mining, use of atomic power for, 138–139
Models, mathematical, of atmosphere, 196–200

National parks, 307
National Research Council, and study of curriculum, 291
National Science Foundation, and study of federal aid to science education, 233; and traveling high-school science libraries, 51
National security, and scientific manpower, 121–132
Natural areas, the Gothic Natural Area in Colorado, 25–32
Natural resources, of U.S.S.R., 132–135
Nature sanctuaries, in the Gothic Natural Area in Colorado, 25–32
Nile Valley, water supply of, 70
Nomenclature, for acids and bases, 255
Nuclear energy, peaceful uses of, 136–141
Nuclear reactors, disposition of fission products of, 89, 140
Nutrition, and radiation of foods, 89–95

Oceanography, factors in cultivation of fisheries, 182, 188
Open system, in biology, 118–119
Optical absorption, in determining properties of semiconductors, 14–15
Ornithology, radar echoes from birds, 204–209

Pasteurization, by radiation, 90–95
Philosophy, and physics, 229
Philosophy of science, and biological roots of human behavior, 33–41; and interpretations of scientific method, 20–24; and meaning of the term *protoplasm*, 112–120; and Poincaré on foundations of physics, 165–175; and relation between mathematics and physics, 85–88
Photochemistry, use of solar energy in, 253
Photoconductive cells, physics of, 17–18; use of, in infrared radiation measurement, 6–11
Photoconductivity, in lead salts, 11–17
Photogrammetry, 299
Photographic equipment, and observation of 1955 solar eclipse, 223

Physics, foundations of, 165–175; of lower atmosphere, 196–200; and measurement of infrared radiation, 3–19; and metaphysics, 229; of photoconductive cells, 17–18; of radar echoes, 204–209; and relation to mathematics, 85–88; of semiconductors, 3–17
Plankton, indicator of, in fishing, 189
Plants, in arid lands, 72–73
Pollution, of atmosphere, 194–203
Polymorphism, zoological problems in, 75–84
Population, movement of, in southern United States, 241
Potassium-argon method, for determining geologic ages, 262
Potassium-calcium method, for determining geologic ages, 261
Power, peaceful uses of atomic, 136–141
Power sources, in arid lands, 73
Printing, of maps, 300
Protoplasm, analysis of concept of, 112–120

Quantum mechanics, development of, 231

Radar, echoes from birds and insects, 204–209
Radiation, dangers of, 140–141; early explanations of, 172–174; of food and other materials, 89–95, 140; measurement of infrared, 3–19
Radioactive methods of dating, 263
Radioactivity, in determining geologic and biologic ages, 258
Radio astronomy, early history of, 55–66
Radiocarbon method, for determining geologic ages, 263
Radio waves, from the Milky Way, 51–62; from the sun, 62–65
Reclamation program in U.S., 306
Recognition of achievement, recommendations for programs of, 284
Reductionism, and biological roots of human behavior, 33–41
Relativity theory, early development of, 167, 169–175; and metaphysics, 231
Religion, and scientific method, 21, 23
Research, scientific, and national security, 124–125; place of, in cultivation of fisheries, 176–193

Scientific attitude, 23–24
Scientific method, discovery and justification in, 20–24
Scientists, shortage in supply of, 277, 282, 286
Sea water, use of solar energy for distillation of, 252
Secondary schools, science education in, 278, 284, 290
Semantics, of the term *protoplasm*, 112–120
Semiconductors, and properties of lead salts, 11–17; use of, in infrared radiation measurement, 3–11
Shell Company Foundation, and training of science teachers, 292
Shellfish, cultivation of, 180–181, 187
Shryock, R. H., views on history of science criticized, 108–109
Skepticism, and scientific method, 21
Sociology of science, in relation to the history of science, 107–111
Soil, in arid lands, 71–72
Solar eclipse, as seen from Ceylon, 221
Solar engines, 250
Spectroscopy, infrared, 3–19
Statistical mechanics, principles of, 168, 172–173
Statistics, use of, in modern physics, 86–87
Sterilization, by radiation, 90–95
Strontium method, for determining age of minerals, 259
Sun, eclipse of, 221; use of energy from, 247
Symbols, as determinants of human behavior, 37–41

Teachers, criticisms of and by, 278; training of, 292
Technical personnel, efficient use of, 283
Technology, effect on industry of, 130; role of, during war, 125–129; of U.S.S.R., 132–135
Terminology, acid-base, 255
Terrapin, cultivation of, 181
Thal desert area, reclamation of, 70
Thermal infrared detectors, 4–6
Ticonderoga, mathematicians who fought at, 236
Topography, mapping of, 294
Trans-Antarctic Expedition, 42–43
Trans World Airlines, and participation in 1955 solar eclipse activities, 222
Tritium method, for determining geologic ages, 264

United Nations, role of special committees of, in development of arid lands, 67–74
United States, population in southern part, 241
U.S. armed services, use of scientific manpower by, 123, 125–129
U.S. Congress, and controversy over Colorado Dam, 304
U.S. Forest Service, 307
U.S. Geological Survey, and map making, 300
U.S. Government, and financing of education and research, 124–125; and regulation of fishing, 183, 184, 187, 190–192; and science education, 278, 282, 286; use of scientific manpower by agencies of, 126–128
U.S. National Park Service, 307
U.S. Reclamation Service, 306
Uranium, supply of, 137
Urban areas, pollution of, 194–203
Urbanization, in the U.S. South, 241; in U.S.S.R., 133
U.S.S.R., manpower and economy of, 132–135

Values, and scientific method, 23

Water supply, in arid lands, 68–71; conservation of, 304
Whorf, B. L., and views on nature of language, 114–116, 119–120
World, map of the, 296

Zoology, and cultivation of fisheries, 176–193; and problems in polymorphism, 75–84
